

Sunny Days Ahead For Keizer Solar As They Launch Their New Eco-Friendly Website.

Keizer Solar, the Oregon based solar panel manufacturing company, has just announced the launch of their website KZRsolar.com. They intend to change how America powers itself.

Keizer, Oregon September 30, 2010

Business is shining brightly these days according to Mike Benson, President of Keizer Solar, the Oregon based solar panel manufacturing company with big plans for restructuring how our country powers itself.

With the launch of their website KZRsolar.com, they hope to reach millions of Americans with their message, "Spend a little up front, save a lot later on." Not to mention saving the environment and creating thousands of jobs at the same time.

Mike and his team of web developers have built an intuitive and streamlined website where users can purchase solar panels for powering homes or businesses, as well as learn about other solar-powered products for home and office use. *"Many Americans have heard about solar power, but from our experience, they still think it's an idea of the future, not an idea of right now. We want to change that."*

KZRsolar.com is not just a platform for e-commerce; it's also a socially-conscientious site with some grand ideas already being implemented. For one, there's a page on the site where people can make a donation to the 'Empowerment Fund.' Mike is very proud of this philanthropic concept. *"The idea behind this is people can help other people afford solar power that might otherwise not be able to. You're helping people and the environment at the same time."*

They also have a job board and a forum for skilled contractors and assembly personnel in the green energy markets. *"People need jobs right now, and the country needs a better source of power. It just made sense to bring the jobs and the people together."*

For more information on the products and services Keizer Solar offers, please visit their site KZRsolar.com.
